Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. Claims 4 and 6-9 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 5 and 10-15 rejected under 35 U.S.C. 103(a) as being unpatentable over Nishikawa et al. (5,907,375) in view of Kubo et al. (6,124,919).

Regarding Claims 1, 2, 5 and 10-15, Nishikawa et al. disclose an input-output unit where in Fig. 5 it is disclosed a flexible liquid crystal display panel 41, a touch panel 42 disposed on the back/bottom side opposite to the visual side of the flexible liquid crystal display panel. Touch panel comprises upper and lower electrodes 53 which come into contact when force F is applied to the liquid crystal display panel from the top. The electrodes are disposed on the back/bottom side opposite to the visual side of the liquid crystal display panel. Nishikawa et al. fail to disclose the liquid crystal display panel substrate to be colored. However, Kubo et al. disclose a half reflection type liquid crystal display device having matched phase of transmitted and reflected light where in Fig. 2, liquid crystal display panel has color filters 12.

Art Unit: 2826

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required color liquid crystal panel in Nishikawa et al. as taught by Kubo et al. in order to have a liquid crystal display device with increased functionality.
